(a) $F_1$: above the wall the small eigenvalue is $\sim T^{(3\alpha-1)/4}$,
so the Clifford form reduced mod $T$ drops from rank 2 to rank 1

(b) The 2 × 3 fibre: one count turns a nondegenerate
reduced form into a degenerate one (valuation 1/200)
eigenvalues of $Q/W$
$10^{0}$
$10^{-1}$
the example (row 1 binds): small eigenvalue
one count later (column 3 binds): small eigenvalue
