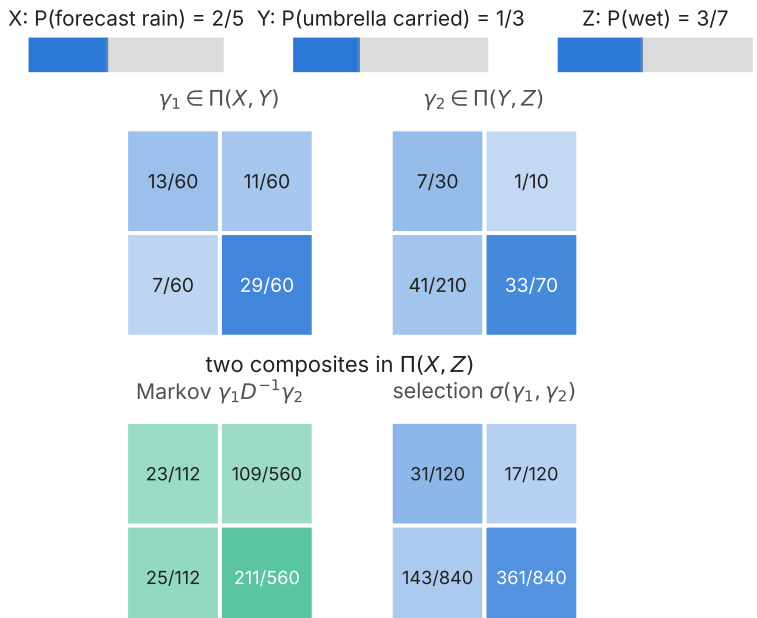
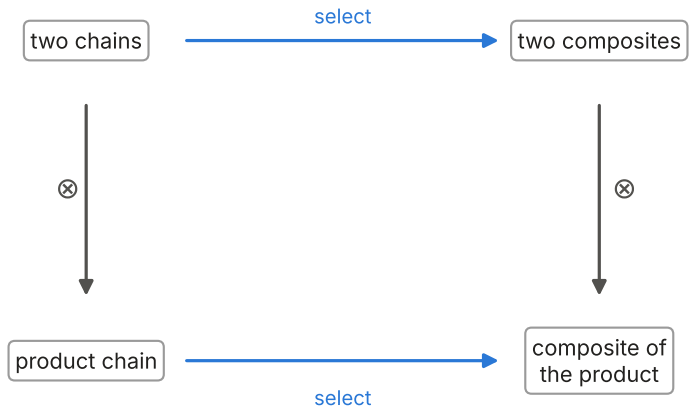
(a) Objects are laws, morphisms are couplings;
the same data compose in two ways



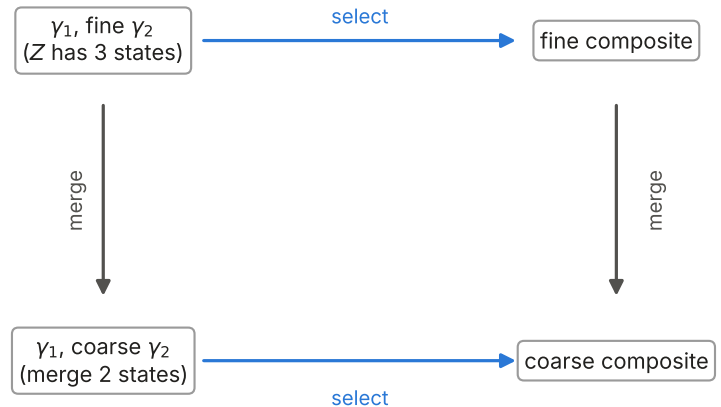
(b) Adding an independent system:
the tensor square



selection: 31/1200 (select, then ⊗) ≠ 29/1400 (⊗, then select)

Markov gluing: the two paths agree

(c) Forgetting a distinction at the end:
the coarse-graining square



selection: 11/90 (select, then merge) ≠ 17/120 (merge, then select)

Markov gluing: the two paths agree
