light suppression
pathway data only (bands overlap)
plus one three-way datum
equal (crossing point)
(d) coordinated poisoning: hiding is cheap and silent; reversing is exposed
honest data
receptor leads: certified
coalition hides it: each source shifts 0.012
undecided, and no contradiction
same, plus an independent assay
assay re-certifies the lead
coalition reverses it: each shifts 0.080
assay contradicts: exposed
